

THE SPACE UTIL GROUP

## Peer Group Comparison Report

**The Space Util Group Peer Group Comparison Report is focussed on providing all members with an information resource that they can use to compare their teaching space utilisation results with other education institutions from around the world as well as discuss the findings.**

To do this the Peer Group Comparison Report is updated each month to include all new members information as well as any new data analysis techniques that The Space Util Group's members would find useful.

Currently The Space Util Group Peer Group Comparison Report includes the following:

- **Introduction**

- **Institution Information and Statistics**

This section includes each members institution estates and teaching space information that has been collected via The Space Util Group's Peer Group Comparison data collection form.

- **Headline Institution Frequency, Occupancy and Utilisation Comparison**

This section includes the headline space frequency, occupancy and utilisation results for each institution, plus key statistics for each institution that can have an effect upon the results i.e. % percentage of total teaching space NIA surveyed.

- **Space Type Frequency, Occupancy and Utilisation Comparison**

This section includes the space type frequency, occupancy and utilisation rates for all institutions. Each space type is provided with a separate analysis section, enabling members to quickly and easily compare their space type usage against other institutions.

- **Day and Timeslot Frequency, Occupancy and Utilisation Comparison**

This section includes the day and timeslot space frequency, occupancy and utilisation rates for each institution. This enables members to compare how their use of space during the teaching week differs to other institutions.

THE SPACE UTIL GROUP

- **Room Ownership (i.e. Department) Frequency, Occupancy and Utilisation Comparison**  
Includes the room ownership teaching space frequency, occupancy and utilisation results for all institutions. Members can use this section to compare how each of their departments usage of teaching compares to other institutions.

- **Space Norm Comparisons by Space Type**

Compares each institutions space norms for each space type, this time enabling institutions to compare how many m2 they assign per workplace, for each space type.

- **Appendix**

This final section includes all the data tables and graphs referred to in the report, as well as any sources and calculation methodologies.

A list of all the members and representative institutions that have been included in this Peer Group Comparison Report

**An additional section of the report comparing actual and timetabled frequency, occupancy and utilisation is also available to all those members that supply their timetable data in addition to their space utilisation data for that week**

**This extra feature is provided at no extra cost.**

**Interested in becoming a member of The Space Util Group?**

Please feel free to contact me direct using the contact details below and I will get back to you ASAP, alternatively if you are interested in receiving more information first—remember to check out the [rest of the website](#) and also sign up to The Space Util Group newsletter to receive extra information and membership offers.
